Toronto, Canada (Citizen) & Doha, Qatar (Family Residency Visa)

PROFESSIONAL EXPERIENCE

AI Operations Specialist **June 2026 – Present**
Opendoor *(Real Estate Tech)*
Toronto, ON, Canada

- Own end-to-end analytics and operations for the utilities activation workflow across acquired homes, auditing AI-generated outputs against source data to catch discrepancies.
- Built a Python and Snowflake-based detection system to catch fall-through contracts before they stall renovations, partnering with ops and engineering stakeholders to debug edge cases, define risk, and automate flagging.
- Built and maintained a golden dataset for utility activation using Parallel AI, combining data cleaning, organization, and SQL-based research to give the team a reliable source of truth for utility provider data.
- Designed and shipped a daily automated "catch net" using Gumloop and MCP-connected Claude to scan Slack for utility turn-on requests the team missed, generating a daily report that prevents renovation delays and reduces reliance on manual monitoring.

Customer Experience (CX) Analyst **January 2025 – August 2025**
Hydro One *(Ontario's Largest Electricity Provider)*
Toronto, ON, Canada

- Took ownership of root-cause research for the myEnergy Rewards program with 30,000+ enrolled customers, synthesizing structured survey data and unstructured support transcripts into actionable findings.
- Identified a root-cause friction point driving drop-off in the enrollment flow; built the data case, proposed the fix, and owned it through to implementation, reducing support escalations.
- Built Power BI and Excel dashboards to track engagement, opt-out rates, and kilowatt savings per event, giving the team visibility.
- Translated complex energy program data into clear communications for audiences ranging from operations teams to executive stakeholders, adapting framing and depth for each.

Software Engineer Intern **May 2024 – December 2024**
IO Industries *(Electronics Manufacturer)*
London, ON, Canada

- Built a lens compatibility calculator (live at ioindustries.com/calculator/cameras) using React.js/Node.js, resolving a top customer frustration cited in 30%+ of support inquiries; tool now used by hundreds of customers per month.
- Developed responsive, mobile-first UI components with clean, maintainable code and validation logic, ensuring consistent cross-browser performance.
- Integrated front-end components with RESTful APIs and backend services, handling JSON data, async state, and unit testing for reliability.
- Worked in Agile sprints, maintained clear documentation, and collaborated cross-functionally with product and engineering teams.

EDUCATION

Bachelor of Science – Computer Science **September 2021 – May 2026**
Bachelor of Arts – Media and Communication Studies
Western University, London, ON

- GPA: 3.7/4.0 Dean's Honour List x4
- Relevant Courses: Data Structures & Algorithms, Unstructured Data, Software Project Management, Web Design & Content Strategy

Certifications: Google UX Design (Foundations, Empathize, Define, Ideate, Wireframing)

SKILLS

- **Product Thinking:** User research, friction identification, roadmap input, hypothesis-driven iteration, data-to-decision synthesis
- **Communication & Stakeholder Management**: Proven ability to tailor messaging to technical, marketing, and executive audiences; journalism background strengthens interviewing and synthesis
- **Organization & Delivery**: Self-directed project ownership from scoping to delivery; experienced managing competing priorities with limited supervision

TECHNICAL SKILLS

- **Programming**: Java, JavaScript, SQL, NoSQL, Python, C, C++, PHP, HTML, CSS
- **Tools:** Snowflake, Gumloop, Parallel AI, React, Redux, Node.js, Docker, GitHub, MongoDB, Figma, Adobe Experience Cloud, MS Office
- **Data & Analytics:** Power BI, Excel, Qualtrics
