PROFESSIONAL EXPERIENCE

AI Operations Specialist **June 2026 – Present**
Opendoor *(Real Estate Tech)*
Toronto, ON, Canada

- Built a dashboard to get electricity and gas turned on at ~1,590 company-owned homes before winter, prioritizing homes at risk of frozen pipes; the team reduced open requests from 5,808 to 3,527 in 10 days.
- Shipped a daily Gumloop/Claude “catch net” that posts a prioritized summary from a Slack channel receiving 300+ utility-support requests/day: emergencies (leaks or imminent inspections/closings), untouched requests, and cases in progress.
- Led a utility-provider directory from research to launch with engineering, testing service activation and analyzing Slack/Gmail records to define database fields and front-end requirements; embedded provider-specific setup instructions in the shared case platform.
- Created and shared reusable Cursor/Codex skills for application forms and check formatting, reducing form-filling time from ~15 minutes manually to ~1 minute with an agent.
- Built Python/Snowflake checks to flag contract issues before they delayed renovations, partnering with engineering and operations to define risks and resolve edge cases.

Customer Experience (CX) Analyst **January 2025 – August 2025**
Hydro One *(Ontario’s Largest Electricity Provider)*
Toronto, ON, Canada

- Categorized customer-support issues by keyword in Excel pivot tables; presented annotated charts to identify recurring friction and inform myEnergy Rewards website and FAQ updates.
- Refined surveys with Research & Insights; analyzed satisfaction, enrollment motivations, and notification feedback, visualizing findings to guide communications and improve the customer experience.
- Tracked weekly enrollment and campaign performance with Marketing; compared participation, opt-outs, and electricity savings across seasons to inform program decisions for 30,000+ enrolled customers.

Software Engineer Intern **May 2024 – December 2024**
IO Industries *(Electronics Manufacturer)*
London, ON, Canada

- Built a live React/Node.js lens compatibility calculator addressing a frustration cited in 30%+ of support inquiries; used by hundreds of customers each month.
- Developed responsive, mobile-first interfaces and integrated REST APIs, implementing validation, asynchronous state handling, and unit tests for reliability.
- Collaborated with product and engineering in Agile sprints, maintaining clear documentation and translating customer needs into working features.

EDUCATION

Bachelor of Science – Computer Science **September 2021 – May 2026**
Bachelor of Arts – Media and Communication Studies
Western University, London, ON

- GPA: 3.7/4.0; Dean’s Honour List ×4
- **Relevant Courses:** Data Structures & Algorithms, Unstructured Data, Software Project Management, Web Design & Content Strategy

Certifications: Pendo Learning Lab — Becoming an AI-native Product Manager (2026)

Google UX course certificates: Foundations; Empathize, Define & Ideate; Wireframes & Low-Fidelity Prototypes

SKILLS

- **Product Thinking:** Problem discovery, customer research, risk-based prioritization, success criteria, iterative delivery
- **Communication & Stakeholder Management:** Journalism-trained interviewing and writing; partner coordination and technical/executive communication
- **Organization & Delivery:** End-to-end ownership, cross-functional execution, process design, team onboarding

TECHNICAL SKILLS

- **Programming:** Python, SQL, JavaScript, Java, C/C++, HTML/CSS
- **Tools:** Cursor, Codex, Claude, Gumloop, MCP, Parallel AI, React, Node.js, Figma, GitHub, Docker
- **Data & Analytics:** Snowflake, Power BI, Excel, Qualtrics, MongoDB
